

Tips for Making Your Poster

1. Short and Simple.

Ask yourself, what part of this clue should the other classes write down? Check your spelling. This is published work!

2. Big Bold Text.

Use a dark marker to make the key words of the clue very dark and large.

3. Write the sentence(s) of the clue on the back of

the poster. This way you can hold it up and read the clue, while the class listening can write down the key word. Or write the sentence on another 3x5 card.

4. Hold the poster still. It is best to stabilize on a table (see above), or on a music stand, easel, or pin to a bulletin board. Movement in a videoconference makes the poster blurry. This poster is on an easel, but note that they didn't use a dark enough marker!
